PROFILE

Senior full-stack developer with 12+ years of commercial experience building eCommerce platforms, custom CMS solutions, and headless storefronts on Shopify, Shopware, PrestaShop, Magento, and WordPress — using PHP, Laravel, Symfony, Node.js, and React. Has led platform migrations, integrated ERP and payment systems, and rebuilt storefronts to improve conversion, performance, and SEO for retail, automotive, food-and-beverage, and travel clients across Europe. Now extending into applied AI — integrating, fine-tuning, training and architecting models into production products, including **Sonix.tn**, an AI-powered email SaaS. Reliable and responsive, with a track record of meeting tight deadlines and earning excellent client feedback across long-running engagements.
